Jal Jeevan Mission

About the front page:

Jal Jeevan Mission: Changing lives of people.

The captured cherishing moment is from Mahoba district of Uttar Pradesh. The smile on her face, upon turning on the tap at her doorstep and witnessing clean water running through it, clearly shows the level of happiness & relaxation, for which they might have to struggle & travel long, costing time & hindering their daily activities.

Narendra Modi
Prime Minister

Our mothers and sisters suffer the most due to every water related problem, and therefore, our sisters and daughters are also at the center of this mission. The time of sisters is now being saved in the houses where pure drinking water has reached. The diseases caused by contaminated water to the children of the families have also reduced.

Jal Jeevan Mission is also a good example of true democracy, the Gram Swaraj, dreamed by revered Bapu.

1. Introduction

Jal Jeevan Survekshan (JJS) was launched by the Hon'ble Vice President of India in Oct.'22, assess districts and States/UTs on their performance in achieving the objectives of the JJM. The overarching purpose is to motivate and bring healthy competition among the districts and recognizing the efforts of the top performing districts periodically. Under JJS, the monthly, quarterly and annual national ranking of districts is published as per the pre-defined criteria during month.

2. Components of Jal Jeevan Survekshan:

- ◆ Self-reporting in JJM-IMIS portal.
- ◆ Assessment of functionality of tap connections and ground truthing, through an independent agency.

3. Key performance indicators

The performance is calculated based on key performance indicators chosen based on coverage percentage of household tap water connection in the Districts/States/UTs. The broad categories are as under:

- i) Physical progress (50 Marks)
- ii) Water quality monitoring & surveillance (30 Marks)
- iii) Institutional arrangements for assured water supply (20 Marks)

4. Category of District

Sr. No.	Coverage	Category
1	0% to less than 25%	Aspirants (★)
2	25% to less than 50%	Performers (★★)
3	50% to less than 75%	Achievers (★★★)
4	75% to less than 100%	High Achievers (★★★★)
5	100%	Front Runners (★★★★★)

5. Felicitations:

In order to motivate districts, following felicitations are given

Monthly felicitation of districts:

- ◆ **3 Best performing districts in each category (total 15 awards)** - For each of five categories the performance score of districts is key performance indicators (KPIs). The top three scoring districts in each category is recognised.
- **3 fastest moving districts within each category (total 12 awards)** - Districts are divided in four categories. Thus, for each category three districts that have provided highest coverage in percentage terms taking base line as beginning of the month, are selected.
- **Districts graduating to higher categories** - The districts that increase the coverage of HHs and move to higher categories are noted here.

In districts where HH tap water connection is more than 75%, it has been decided that criteria of certification will be given weightage from April-2023 onwards. This will motivate the districts to get the villages certified as Har Ghar Jal. The calculation of scores in Fastest moving category for High Achievers districts will consist of two factors i.e., i) fastest provision of residual coverage (weightage 80) & ii) fastest provision of Har Ghar Jal (HGJ) certification (weightage 20), as explained below

$$\text{Score of district} = \frac{\text{Residual coverage scores} \times \text{weightage (80\%)}}{100} + \frac{\% \text{ of villages having been HJG certified} \times \text{weightage (20\%)}}{100}$$

Where,

$$\text{Residual coverage score} = \frac{\text{HHs provided with FHTC after 1 Oct '22}}{(n/18) \times \text{residual no. of HHs as on 1 Oct '22}} \times 100$$

where, n = month number starting from Oct '22

And, the factor 18 is the number of months remaining from when the Jal Jeevan Survekshan was launched in Oct. '2022 till the target completion date of the mission which is March '24.

$$\% \text{ of villages having been certified} = \frac{\text{no. of villages having been certified}}{\text{Total number of villages in the district}} \times 100$$

This Bulletin covers performance of States/ UTs and top performing districts among various predefined categories, during July'2023. Ranking and scores for all districts are readily available on web in open domain under "Jal Jeevan Survekshan 2023" on JJM dashboard. The process has been explained under chapter FAQ.

6. RANKING OF STATES/ UTs

6.1 Categorisation of States/ UTs

For the purpose of fair competition, the States are classified into three categories as below:

- States with coverage of Household (HH) tap water supply is less than 50% as on 1 Oct 2022.
- States with coverage of Household (HH) tap water supply is more than 50% & up to 75% as on 1 Oct 2022.
- States with coverage of Household (HH) tap water supply is more than 75% & upto 100% as on 1 Oct 2022.

The annual score of States under JJS-2023 is calculated out of maximum marks of 1000. The 400 marks out of 1000 marks are based on aggregate score of districts. Remaining 600 marks are based on functionality assessment (400) and achievement of State level indicators (200).

For each month, the score of districts is calculated as per the criteria based on the category of the district in which it falls at the beginning of the month. The average of “district score” for that month becomes State score for the month.

$$\text{Provisional Monthly Score of State/UT} = \frac{\sum \text{Score of districts for the month}}{\text{No. of districts}} \times 4$$

Similarly, the score of State for quarter is calculated as average of monthly scores of three months. Thus, the formula for calculation of quarterly score is as under:

$$\text{Provisional Quarterly Score of State/UT} = \frac{(\sum \text{Score of districts for 1}^{\text{st}} \text{ month} + \sum \text{Score of districts for 2}^{\text{nd}} \text{ month} + \sum \text{Score of districts for 3}^{\text{rd}} \text{ month})}{3 \times \text{No. of districts}} \times 4$$

The factor of 4 is applied to find the trend of State’s score. For annual score, the scores for each quarter (out of 100) are added and score is calculated out of 400.
